

EXPERIENCE

Scaler AI Labs**Jan. 2026 – May 2026***Software Engineer Intern · Partnering with frontier AI labs (OpenAI, Meta, xAI)**Bengaluru, India*

- Architected **Pulse**, an employee-productivity tracker shipped to **20,000 production users**: desktop client → S3 presigned URLs → Celery + Redis → LLM extraction → **ClickHouse** (analytics) + **Postgres** (auth/CRUD); Hamming-distance perceptual hashing on consecutive frames cut idle-frame upload and LLM cost sharply.
- Built a **distributed MCP (Model Context Protocol) server** from scratch in Java/Python at **sub-200ms p99 latency** across concurrent tool-use workflows – adopted by partner teams at **OpenAI and xAI**.
- Shipped **5 production-grade RL simulation environments** (HelloSign – **92.94% approval**; Shopify Admin; Asana MCP – **52 tasks at a perfect 1.0 score**; Hootsuite; MS Excel), several delivered fastest with the lowest QA bug count.
- Architected a **distributed crawler-scraper** (Python, Playwright, Redis) processing **100K+ pages/day** with priority-tier crash recovery across **9M+ products**; authored **10K+ curated task suites** with automated graders (React + Django) at **98%+ accuracy**, cutting review cycles **50%**; mentored 2 new joiners.

Wealthy (Fintech)**Mar. 2025 – Aug. 2025***Software Development Engineer – 1 (SDE-1)**Bengaluru, India*

- Led end-to-end development of an internal CRM platform supporting **INR 4,000+ Cr AUM** and **INR 190+ Cr** monthly gross sales across **7,700+ active partners**.
- Designed and optimized **GraphQL resolvers + REST services** on PostgreSQL/Redis, cutting API p95 latency **32%** via batching, indexing, and caching, and improving core-flow conversion **37%**.
- Proposed product-level improvements directly to the PM beyond engineering scope; evaluated GraphQL-vs-REST tradeoffs for scalability.

Wealthy (Fintech)**Aug. 2024 – Feb. 2025***SDE Intern**Bengaluru, India*

- Architected the initial CRM from scratch (React, Next.js, REST APIs); established component and API design patterns adopted by the full-time team; built modules used by **20+ stakeholders**.

PROJECTS

Viveka – Meta x Scaler OpenEnv Hackathon (Top 9, All-India), 2026*Tech: Python, PyTorch, GRPO, TRL, Unsloth, FastAPI, Docker*

- **Top 9** at the Meta x Scaler OpenEnv Hackathon – the largest GenAI hackathon ever by participant count (**70,000+ registrations** → 2,000+ on-campus finalists) – beating teams from IITs and professionals at IBM, Cisco, Meesho, Microsoft, and Verizon.
- Built **Viveka**, an RL environment teaching LLM agents to pause and ask before irreversible actions on Indian DPI (UPI VPAs, DigiLocker, IRCTC tatkal), scored by a **6-component deterministic reward** (Brier scoring + state-diff + hard safety gate), with **no LLM-as-judge**.
- Trained Qwen-1.5B via GRPO (TRL + Unsloth 4-bit QLoRA) to **45% of Claude Sonnet's hardest-tier score at 0.05% of the parameters** – a **+69% relative lift** over the frozen baseline; diagnosed and patched **HuggingFace TRL #2820** mid-training (147 passing tests, live Hinglish demo on HF Spaces).

LEADERSHIP & IMPACT

Chairperson, Yugaantar – SST’s First Student-Led Fest
Scaler School of Technology

Sep. 2025 – Nov. 2025
Bengaluru, India

- Owned end-to-end execution of a ~INR 55L budget fest – led 21 HODs and 200+ student organizers; restructured operations after 2 prior failed editions.
- Drove 6,500+ registrations from 800+ colleges and 2,500+ on-campus footfall; SST teams secured 9 podium finishes across 3 externally-judged competitions, beating teams from IITs, NITs, BITS, IIITs, and IIMs.
- Closed sponsorships from Blinkit, Jio, RedBull, Plush, Dymension after primary sponsors backed out; covered in Times of India, with Yugaantar Instagram crossing 3M+ views.

President, Student Council
Scaler School of Technology

Sep. 2023 – Jan. 2025
Bengaluru, India

- Built a sustainable, process-driven ops structure for clubs and student initiatives; created the inter-house system around the college’s RICE principles (Resilience, Integrity, Curiosity, Excellence).

EDUCATION

Scaler School of Technology
B.Sc. in Computer Science

Aug. 2023 – Present
Bengaluru, India

Birla Institute of Technology and Science (BITS Pilani) (Degree Partner)
B.Sc. in Computer Science

Aug. 2023 – Present
India

TECHNICAL SKILLS

Languages	Python, Java, Go, C++, JavaScript, TypeScript, SQL
AI / ML	PyTorch, HuggingFace Transformers, TRL (GRPO/PPO/DPO/SFT), Unsloth, RL Environments, LLM Eval, MCP
Backend	FastAPI, Django, Spring Boot, Node.js, Express, REST, GraphQL, Celery, gRPC
Frontend	React, Next.js, Tailwind CSS
Databases	PostgreSQL, Redis, MongoDB, ClickHouse, MySQL
Infra & Tools	Docker, AWS (S3, EC2), NGINX, Git, Linux, CI/CD, HuggingFace Spaces
